

## GUÍA DE TRABAJO - Resolución de ecuaciones con una incógnita

**1** Resuelve las siguientes ecuaciones.

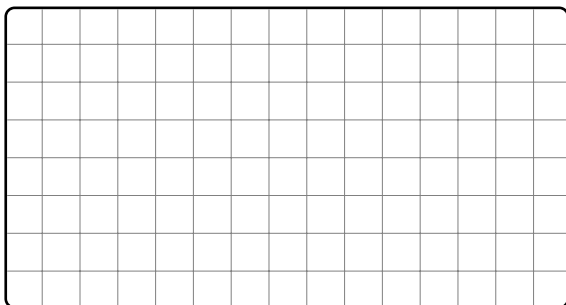

**A**  $3x - 4 = -11$

A rectangular grid with 20 columns and 10 rows, intended for showing the steps to solve the equation  $3x - 4 = -11$ .

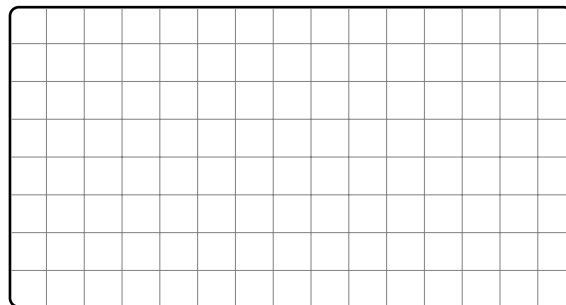

**B**  $3 - x = 3x$

A rectangular grid with 20 columns and 10 rows, intended for showing the steps to solve the equation  $3 - x = 3x$ .

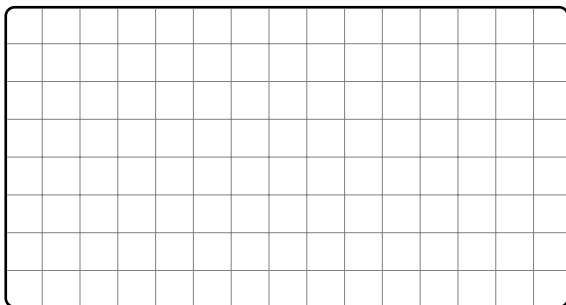

**C**  $4 - \frac{x}{2} = \frac{18}{4}$

A rectangular grid with 20 columns and 10 rows, intended for showing the steps to solve the equation  $4 - \frac{x}{2} = \frac{18}{4}$ .

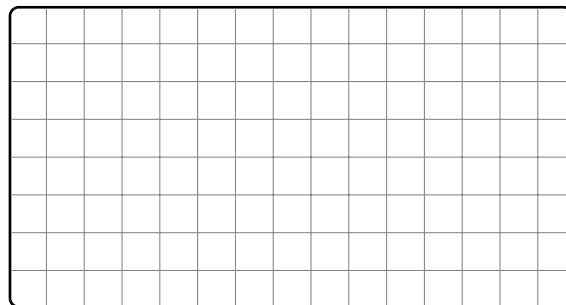

**D**  $-x + 11 = -2x + 6$

A rectangular grid with 20 columns and 10 rows, intended for showing the steps to solve the equation  $-x + 11 = -2x + 6$ .

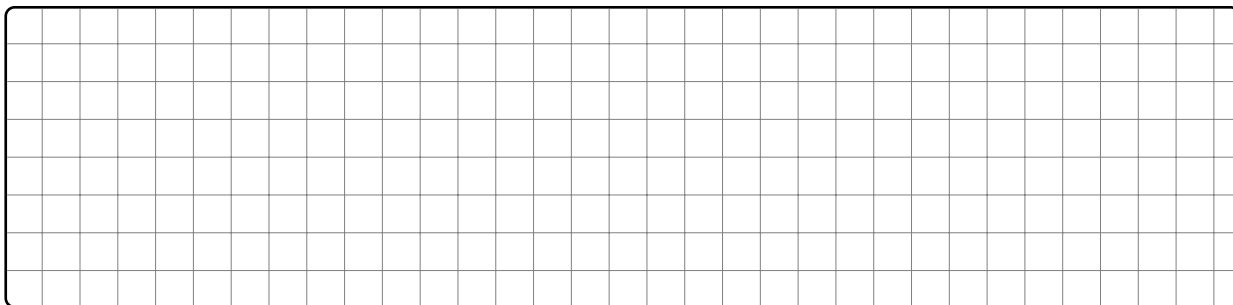

**E**  $3(x - 6) = 2(9 - 3x)$

A rectangular grid with 20 columns and 10 rows, intended for showing the steps to solve the equation  $3(x - 6) = 2(9 - 3x)$ .

**F**  $3x - 4 = 6x + 20$

A rectangular grid with 20 columns and 10 rows, intended for showing the steps to solve the equation  $3x - 4 = 6x + 20$ .

**G**  $\frac{x}{2} = 1 - \frac{3x}{4}$

A wide rectangular grid with 40 columns and 10 rows, intended for showing the steps to solve the equation  $\frac{x}{2} = 1 - \frac{3x}{4}$ .

**H**

$$3,5x + 4 = 2,5x - 5$$

**I**

$$2(x + 7) = 3(x - 1)$$

**J**

$$\frac{x}{2} + \frac{7}{4} = \frac{3}{2}$$

**K**

$$\frac{3x}{10} - \frac{6}{5} = \frac{3}{5}$$
